DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 25-44 is withdrawn.. The rejection of these claims under 35 USC§102(a) over Maignan et al has been reinstated. Also the claims are being rejected under 35 USC§112, 1st paragraph.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 25-44 rejected under 35 U.S.C. 102(a) as being clearly anticipated by Maignan et al. (US Pat. 6,514,507).

Applicants' argued that the reference does not disclose the claimed uses and the use of a therapeutically effective amount of the HDA. However, a review of the instant spec reveals that the instantly claimed amount appears to be in the range of about .25-.5%. The reference uses in the examples a range of about 0.5-10 wt %. The uses claimed in the preamble fail to distinguish over the method of the reference since these uses would result from the administration of the amount utilized in the method of Maignan.

Additionally, there is nothing in the arguments or the instant spec that defines what the effective amount is.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 25-44 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims are non enabled particularly the “method of regenerating ligaments, preventing degenerative disease.” The specification indicates that they have demonstrated the claimed activities, however there is no evidence of record. The instant examples were conducted in-vitro to demonstrate lipolytic activity but failed to enable the methods as claimed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah D. Carr whose telephone number is 571-272-0637. The examiner can normally be reached on Monday-Friday 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
